

Independent RFQ review

Fixed-scope quote request. No work is authorized by this brief.

The assignment

Review one civilian janitorial RFQ response against the original solicitation, amendments, evidence, and required attachments. Our software prepares the draft. You provide an independent compliance review.

Proposed limits

Up to 60 solicitation/amendment pages, 30 company-evidence pages, a 10-page response, and three references. Attachments count toward the relevant limit. Confirm the actual package before quoting.

Required outputs

Provide a finding log with each source page, obligation, response location, problem, required correction, and closure status. Check for obligations missing from our requirement list. Check source support, reference sufficiency, supplied prices, forms, signatures, amendments, page limits, and submission instructions.

Correction and decision

Include one correction check. Record Accept, Accept after listed corrections, or Cannot accept for the exact final version. List anything you could not verify. An unresolved mandatory issue prevents acceptance.

Budget and timing to quote

Target budget: \$400 USD, subject to your quote. Proposed first review: two business days. Proposed correction check: one business day. Confirm feasibility, earliest slot, payment terms, exclusions, and extra charges.

Experience and handling

Provide recent civilian RFQ review examples, a lawful redacted finding log, and a reference. Confirm confidentiality, conflicts, secure transfer, and the agreed document deletion period. Payment does not depend on an acceptance decision or contract award.

Start condition

We confirm the source manifest, fee, review dates, and written work order after the customer funds the pilot. Please do not begin paid work before that authorization.
